INTERNSHIP PROGRAM TABLES

Program Tables Updated: May 2021

I. Internship Program Admissions

The Brattleboro Retreat's Clinical Psychology Doctoral Internship program is designed to provide an immersive experience in providing psychological services in inpatient and outpatient psychiatric settings. In both settings, interns work as part of an integrated team that includes psychiatrists, nurses, psychologists, social workers, substance abuse counselors, and mental health workers. Many of our patients present with co-occurring disorders (i.e., mental health and substance use). Interns provide assessments, brief, short-term and long-term therapy, group facilitation and psychological assessments. Much of the work is team-based. Following APA internship requirements, interns spend a minimum of 25% of their time in direct client contact.

Interns may select either an inpatient (IP) or outpatient health care setting (PHP) as their primary rotation in which a majority of their time (at least 50%) is spent working. However, following the APPIC protocol, applicants may choose to apply to both tracks (PHP and IP) and rank order their preference.

Outpatient work consists mostly of providing psychological services in the Retreat's partial hospitalization program(s) where they gain experience in group facilitation, case management, and individual assessment and treatment. Also, interns have the option of facilitating groups in the various inpatient programs at the Retreat. The PHP track is based on a 40-hour week, Monday through Friday (typically 8am to 4pm)

For the 2021-2022 Internship year there are three PHP rotations – Birches (serving the general population), the Uniformed Services program (serving law enforcement, military, fire, EMS, and corrections personnel), and the Medical Professionals program. Rotation between the three programs is based on a combination of the Intern's learning goals, and program staffing needs.

Interns selecting the inpatient health care setting as their primary rotation also gain experience in group facilitation, and individual assessment and treatment. The Retreat has two adult inpatient units where interns provide psychological services. Patients in these programs are dealing with a wide range of issues including alcohol and substance use, co-occurring disorders, episodes of acute psychological distress, and long-term psychiatric conditions. The primary treatment modalities are Acceptance and Commitment Therapy (ACT), DBT, and skills based activities delivered, in a group format. The Inpatient track is based on a 40-hour work week (typically 8am to 4pm). At this time, the days of work are Monday through Friday. However, in previous years we have required Interns on this rotation to work four weekdays and one weekend day in order to provide consistent clinical programming on weekends. This schedule is currently under review; applicants should be aware that a decision may be made to revert to this schedule in the future. If this occurs, we will provide prior notification.

Besides primary work in the Retreat's inpatient or partial hospitalization programs, interns carry for the duration of their internship a small, individual outpatient therapy caseload, which is typically three to four patients with psychological and sometimes medical (i.e., behavioral medicine) conditions. Interns are expected to have prior experience conducting intake assessments (e.g., biopsychosocial history, suicide risk assessment, substance use assessment) and conduct regular intake assessments throughout the year. In addition, conducting psychological and neuropsychological assessments is required; the

depth and scope of these assessments will depend on the intern's prior experience and current interests.

Preference is given to applicants with demonstrated interest and experience in the following areas:

- Third wave cognitive behavioral therapies (e.g., Acceptance and Commitment Therapy, Dialectical Behavior Therapy, Functional Analytical Psychotherapy, Mindfulness-Based Cognitive Therapy)
- Behavioral medicine
- Hospital outpatient and/or community mental health services
- Treatment of specialized populations including LGBTQ, military, first responders (e.g., fire, EMS), enforcement (e.g., police, corrections, agents of state and federal agencies), and co-occurring disorders (i.e., mental health and substance use)
- Psychological and neuropsychological assessment

Eligibility requirements for the program are as follows:

- Applicant must be a candidate for the Ph.D., Psy.D., or Ed.D. in an APA or CPA accredited doctoral training program. Acceptable program types are:
 - Clinical Psychology
 - Counseling Psychology
- All coursework toward the doctoral degree must be completed by the end of the academic year prior to the start of internship
- Certification of internship readiness by the applicant's academic program
- Completion of a minimum of 4 years of graduate training prior to start of the Internship

The program requires that applicants have completed a minimum number of intervention and assessment hours at the time of application:

Total Direct Contact Intervention Hours: 350

Total Direct Contact Assessment Hours: 50

II. Financial and Other Benefit Support for Upcoming Training Year

Annual Stipend / Salary for Full-time Interns \$24,000

Annual Stipend / Salary for Half-time Interns N/A

Program provides interns with access to medical insurance as follows:

Trainee contribution is required (Retreat pays majority of costs)

Coverage of family members is available

Coverage of legally married partner is available

Interns are provided with 22 days of Paid Time Off that includes vacation days, holidays falling on a normal workday (i.e., New Year's Day, President's Day, Memorial Day, July 4th, Labor Day, Thanksgiving Day, and Christmas Day), medical and personal time.

In the event of medical conditions and/or family needs that require extended leave the program allows reasonable unpaid leave to interns in excess of paid time off. Interns will be required to complete at least 2000 hours of onsite work prior to being certified as having satisfactorily completed the internship.

Other Benefits:

- EAP services
- Optional life insurance
- Optional dental insurance
- On-site full-day CE courses (APA accredited) – up to six per year at no charge. *Note: at this time this service is temporarily suspended due to COVID-19 physical distancing requirements*
- On-site exercise facilities
- Employee discount program
